AUTHOR INDEX

ABELE, C. A., role of acids in food equipment sanitation, 379
ADAMS, G. A., (see Overcast, 14)
ADAMS, H. S., intersociety academy for certification of sanitations, 45
BABEL, F. J., (see Willits, 362)
BECKER, M. E., water-borne and food-borne viruses, 243
BERRIDGE, N. J., milk volume delivered by 0.01 ml loop, 371
BLACK, L. A., (see Brazis, 255; Donnelly, 18)
BOWEN, O. R., the public health profession, 1
BRADSHAW, P. L., freezing point of milk, 246
BRAZIS, A. R., correlation between methylene blue test and standard plate count, 255
BUCY, J. L., relation between keeping quality of raw milk and standard plate, thermoduric and coliform counts, 122
CHENG, K. J., (see Jones, 316)
CHOI, S. S., relation of yellow color on sediment pads to mastitis, 53
CONNER, D. J. (see Randolph, 188, 276)
CORDELL, V. E., food service industry looks at the sanitarian, 10
CRUME, N. M., (see Langlois, 214)
DABBAH, ROGER, correlations between standard plate count and microscropic counting procedures, 366
DALTON, R. R., investigations of food-borne disease, 348
DELLINGER, J., (see Jasper, 199)
DEMOTT, B. J., freezing point of milk, 319
DONNELLY, C. B., evaluation of state central milk laboratories, 18
EAGAN, H. E., community sanitation programs, 111; professional development, 313
EDMONDSON, J. E., (see Bradshaw, 246)
FISCHER, F. H., 3-A sanitary standards program, 132
FLYNN, C. W., plastic containers for packaging crabmeat, 218
FOREST, H. L., one quality standard for all milk, 81
FORSTER, T. L., (see Choi, 53)
FOSTER, E. M., development in botulism research, 342
FOTER, M. J., (see Richardson, 148)
FRAZIER, W. C., (see Seminiano, 161)
FRYE, J. B., JR., (see Gholson, 248)
GELPI, A. J., (see Gholson, 248)
GHOLSON, J. H., effect of pipeline level on acid degree value of milk, 248
GIBSON, D. L., (see Jones, 316)
GILL, J. N., improvement in environment through better regulation, 69
GREENE, V. W., environmental microbiology and environmental health, 35
HARDING, H. G., water quality act of 1965, 350
HOPPER, S. H., sanitation of food vending machines, 372
JACKSON, W. E., air pollution, 145
JASPER, D. E., variations in volume of milk delivered by 0.01-ml loop, 199; (see Schneider, 5, 49)
JOHNS, C. K., use of sanitizers in preventing mastitis, 309
JONES, G. A., atypical coliforms on violet red bile agar, 316
JONES, T. L., 3-A sanitary standards, 224
KISSINGER, J. C., bacterial control in maple sap by irradiation, 279
KOSIKOWSKI, F. V., training for international development, 305
LANGLOIS, B. E., keeping quality of dairy products, 214; (see Randolph, 276)
LEVIN, R. E., sanitation in fishing trawler holds, 336
MARSHALL, R. T., (see Bradshaw, 246; Singh, 333)
MCCAFFREY, J. C., cost of milk laboratory approval program in Illinois, 115
MOATS, W. A., (see Dabbah, 366)
MOORE, S. A., (see Woodley, 211)
MUELLER, W. S., procedure for washing and sanitizing soft-serve freezer, 197
MULL, L. E., (see Smith, 251)
NELSON, F. E., (see Thomas, 156, 182)
OHRI, S. P., quality of raw milk from Ohio markets, flavor, 88; bacterial enumeration by four methods, 118
OLSON, N. F., (see VonRuden)
OVERCAST, W. W., psychrophile growth is influenced by previous growth in milk, 14
PEELER, J. T., (see Donnelly)
RANDOLPH, H. E., abnormal milk programs, 188; temperature of bulk tank milk at pick-up, 276; (see Bucy 122; Langlois, 214)
REINBOLD, G. W., (see Thomas, 156, 182)
RICHARDSON, L. A., pesticides and the food supply, 148
SAWYER, F. M., (see Levin, 336)
SCHEURER, P. G., (see Levin, 336)
SCHNEIDER, R., variation in counting breed smears, 5; influence of working factor and cell content on precision of leucocyte counts, 49
SCHULTZE, W. D., cellular content of cows milk, comparison of CMT and microscopic count, 126; (see Smith, 84)
SEMINIANO, E. N., effect of pseudomonads and *Achromobacteraceae* on growth of *S. aureus*, 161
SINGH, B., effect of leucocyte degeneration on mastitis screening tests, 333
SLATTER, W. L., (see Ohri, 88, 118)
SMITH, J. W., cellular content of cows milk, evaluation of California mastitis test, 84; (see Smith, 126)
SMITH, K. L., effect of plating procedures on bacterial counts of dry milk, 251
STOCK, D. A., vacuum pan evaporator condensate for plant uses, 40
SUGIYAMA, H., (see Foster, 342)
TATRO, M. C., (see Flynn, 218)
THOMAS, W. R., effect of pH of medium on enumeration of pasteurization-resistant bacteria in milk, 156; effect of peptone on enumeration of pasteurization resistant bacteria, 182
TOWER, D. R., tuberculosis in Michigan deer, 222
TOWNSEND, C. T., spoilage in canned foods, 91
UETZ, F. E., presidential address, 273
VON RUDEN, K. L., media for enumerating *S. aureus* treated with hydrogen peroxide in milk, 77
WALTER, W. G., progress on "Standard Methods", 338
WECKEL, K. G., sanitary standard for freezer-dispensed ice milk, malted milk, and shakes, 180
WEIGOLD, G. W., sanitation problems in American dairy products overseas, 374
WILLITS, C. O., (see Kissinger, 279)
WILLITS, R. E., factors affecting catalase test, 363
WILSON, S. G., oval tube vs. standard plate count, 191
WOODING, N. H., JR., problems and treatment of private water supplies, 73
WOODLEY, R. A., deep well waste disposal, 211

SUBJECT INDEX

Acid degree value, effect of milk pipelines on, 248
Ari pollution, in metropolitan areas, 145
American intersociety academy for sanitarians, program for certification, 45
Bacteria,
  psychrophiles, growth in pasteurized milk, 14
  staphylococci, media for, 77
  Staphylococcus aureus, 161
Bacterial counts,
  coliform,
    atypical colonies on selective medium, 316
    relative to keeping quality of milk, 122
    relation to raw milk, 122
  comparison of standard plate with oval tube method, 191
  direct microscopic,
    correlation with plate count, 366
    variations in standard loop, 199
  loop method, 371
  comparison of methods, 118
  in maple sap, 279
  methylene blue test, correlation with standard plate count, 255
  nonfat dry milk, effect of selected procedures on, 251
  oval tube method, comparison with standard plate, 190
  prelininary incubation test, relative to raw milk, 122
  relation to keeping quality of milk, 122
  standard plate,
    correlations with direct microscopic procedures, 366
    correlation with methylene blue test, 255
    comparison with oval tube method, 191
    evaluation of, 19
    relation to keeping quality of milk, 22
    relation to raw milk, 122
  standards,
    for freezer-dispensed products, 180
    for ice milk, 180
    for malted milk, 180
    for milk shakes, 180
  staphylococci, effect of pseudomonads and achromobacter on growth of, 161
  thermoduric,
    relation to keeping quality of milk, 122
    relation to raw milk, 122
    effect of pH, 165
Botulism, research developments, 342
California mastitis test, evaluation of, 84
Canned foods, spoilage, 91
Catalase test, factors influencing, 362
Chocolate milk, keeping quality, 214
Citation award, 287
Coliform bacteria, atypical colonies on selective medium, 316
Dairy products,
  sanitation problems overseas, 374
  standard methods for examination, 338
  water quality act of 1965, 350
Environmental health,
  community sanitation programs, 111
  improvement through regulations, 69
  microbiology, relation to, 35
  needs of metropolitan areas, 130
Environmental microbiology, defined, 36
Farm bulk tanks, temperature variations of milk in, 276
Fish,
  botulism, 342
  sanitation in trawler holds, 336
Food,
  botulism, 342
  contamination by pesticides, methods of, 150
  canned, spoilage, 91
  equipment sanitation, 379
  fish, sanitation in trawler holds, 336
  international training programs, 305
  investigation of disease outbreaks, 348
  pesticides in, 148
  research institute, 239
  training programs, 305
  vending machines, sanitation problems, 372
  viruses in, 243
Food-borne disease, investigation of outbreaks, 348
Food equipment, acid cleaning, 379
Food industry, water quality act of 1965, 350
Food poisoning, botulism research, 342
Freezing point of milk,
  factors affecting, 319
  survey of, 246
Hydrogen peroxide, effect in milk on staphylococcus counts, 77
Ice milk, sanitary standards for, 180
IAMFES

    life membership, 288
    sanitarians
      list of recipients, 289
      recipient, 285
  committee on applied laboratory methods, interim report (1965), 103
  committee on applied laboratory methods, report (1966), 383
  committee on baking industry equipment, report (1965), 104
  committee on communicable disease affecting man, report (1965), 105

committee on food equipment sanitary standards, report (1965), 25
committees, list of, 135
offices, nominees for office, 62, 63
presidential address, 273
Intersociety academy for sanitarians, 45
Interstate milk shippers program,
cost of laboratory approval program, 115
laboratory evaluation, 19
Laboratories, evaluation of, 19
Leucocytes,
counting of, 5
influence of working factor on counts, 49
Low-fat milk, keeping quality, 214
Malted milk, sanitary standards for, 180
Maple sap,
bacterial quality, 279
irradiation of, 279
Mastitis,
California mastitis test, comparison to leucocyte count, 127
catalase test, factors influencing, 362
evaluation of California mastitis test, 84
leucocyte counts, 5, 49
leucocyte degeneration, 333
sanitizers use in prevention, 309
screening tests, 333
yellow color on sediment pads, 53
Milk,
abnormal milk programs, survey of, 188
catalase test, 362
cellular content, 126
correlation between bacterial counts of, 366
correlation between standard plate and methylene blue test, 255
direct microscopic examination, 199
farm bulk tank, temperature variations in, 276
flavor, 88
freezing point
factors affecting, 319
survey, 246
survey in Tennessee, 319
H_2O_2 treatment, effect on staphyloccus counts, 77
keeping quality of low-fat skimmilk and chocolate flavored, 215
keeping quality related to bacterial counts, 122
laboratory, cost analysis, 115
leucocytes
counting of, 5
effect of working factor on counts, 49
psychrophilic, growth in pasteurized milk, 14
quality in Ohio, 88, 118
rancidity, pipelines, effect on, 248
mastitis, screening tests, 333
single quality standard, 81
standard methods for examination, 338
standard plate vs. oval tube method, 190
test for mastitis, 84
thermoduric bacterial counts, 156
Milk products, freezer dispensed, sanitary standards for, 180
Milk shakes, sanitary standards for, 180
Nonfat dry milk, effect of procedures on bacterial counts, 251
Packaging, for crab meat, 218
Pesticides,
analytical methods for, 152
in food, 148
regulations and control of, 148
review of problem, 148
Public health,
contributions of professions, 4
image, 1
tuberculosis in deer parks, significance, 222
Rabies, problem of control, 228
Rancidity, effect of high and low level milk pipelines, 248
Regulations,
abnormal milk, 188
improvement in environment, effect on, 69

food-borne, 243
water-borne, 243
Vending machines, sanitation problems, 372
Waste disposal, deep well system, 211
Water,
problems of private systems, 73
quality act of 1965, 350
treatment of private supplies, 73
vacuum pan condensate reuse, 40
viruses in, 243

CONTENTS, VOLUME 29

JANUARY (NO. 1)

A Physician Looks at the Public Health Profession. *Otis R. Bowen* ---- 1
Some Factors Responsible for Variation in Counting Somatic Cells on Prescott-Breed Smears of Milk. *R. Schneider and D. E. Jasper* ---- 5
How the Food Service Industry Looks at the Sanitarian. *Vernon E. Cordell* ---- 10
Growth of Certain Psychrophilic Bacteria in Pasteurized Milk as Influenced by Previous Excessive Psychrophilic Growth in the Raw Milk. *W. W. Overcast and George A. Adams* ---- 14
Evaluation of State Central Milk Laboratories by Statistical Analyses of Standard Plate Counts. *C. B. Donnelly, J. T. Peeler and L. A. Black* ---- 19
Association Affairs ---- 25
Report Food Equipment and Sanitary Standards—1965 ---- 25
Report of 3-A Sanitary Standards Administrative Symbol Council ---- 26
News and Events ---- 28
Affiliates of IAMFES, Inc. ---- 33

FEBRUARY (NO. 2)

Environmental Microbiology and Environmental Health. *V. W. Greene* ---- 35
Suitability of Low Temperature Vacuum Pan Evaporator Condensate for Plant Uses. *Daniel A. Stock* ---- 40
Amendment to 3-A Sanitary Standard for Pumps, for Milk and Milk Products, Revised ---- 44
The American Intersociety Academy for the Certification of Sanitarians, Inc. *H. S. Adams* ---- 45
The Influence of the Working Factor and Cell Content on the Precision of Microscopic Counts of Milk Somatic Cells. *R. Schneider and D. E. Jasper* ---- 49
The Relationship of Yellow Color on Milk Sediment Pads to Mastitis. *Sung S. Choi and T. L. Forster* ---- 53
Association Affairs ---- 57
Report of Committee on Dairy Farm Methods, 1965 ---- 57
News and Events ---- 67

MARCH (NO. 3)

Improvement in the Environment Through Better Regulation. *Joseph N. Gill* ---- 69
Private Water Supply-Problems and Treatment. *N. Henry Wooding, Jr.* ---- 73
Media for Enumerating Staphylococcus Aureus Treated with Hydrogen Peroxide in Milk. *K. L. Von Ruden and N. F. Olson* ---- 77
One Quality Standard for all Milk-An Attainable Goal. *H. L. Forest* ---- 81
The Cellular Content of Cows Milk.
I. An Evaluation of the California Mastitis Test as a Method of Estimating the Number of Cells in Milk. *J. W. Smith and W. D. Schultze* ---- 84
The Quality of Raw Milk from Selected Ohio Markets. I. Flavor. *S. P. Ohri and W. L. Slatter* ---- 88
Spoilage in Canned Foods. *Charles T. Townsend* ---- 91
3-A Accepted Practices for Permanently Installed Sanitary Product-Pipelines and Cleaning Systems ---- 95
Holders of 3-A Symbol Council Authorizations on February 20, 1966 ---- 100
Association Affairs ---- 103
Report of Committee on Applied Laboratory Methods ---- 103
Report of Committee on Baking Industry Equipment ---- 104
Report of Committee on Communicable Diseases Affecting Man ---- 105
News and Events ---- 106

APRIL (NO. 4)

Performance Analysis in Community Sanitation Programs. *H. E. Eagan* ---- 111
Cost Analysis of the Milk Laboratory Approval Program in Illinois. *J. C. McCaffrey* ---- 115
The Quality of Raw Milk from Selected Ohio Markets II. Bacteriological Enumeration by Four Methods. *S. P. Ohri and W. L. Slatter* ---- 118
Relationship Between the Keeping Quality Properties of Grade A Raw Milk and Standard Plate, Thermoduric and Coliform Counts. *J. L. Bucy and H. E. Randolph* ---- 122
The Cellular Content of Cows Milk. II. Comparison of the CMT and Microscopic Count for Estimating Cell Concentrations in Quarter Samples. *W. D. Schultz and J. W. Smith* ---- 126
A County Sanitarian Looks at the 3-A Sanitary Program. *Fred H. Fischer* ---- 132
Association Affairs ---- 135
IAMFES List of Committees
News and Events ---- 138

MAY (NO. 5)

The Air Pollution Story in a Metropolitan Area. *Walter E. Jackson* ---- 145
Pesticides and the Food Supply. *L. A. Richardson and Milton J. Foter* ---- 148
Effect of pH of Plating Medium on Enumeration of Pasteurization-Resistant Bacteria in Milk. *W. R. Thomas, G. W. Reinbold and F. E. Nelson* ---- 156
Effect of Pseudomonads and Achromobacteraceae on Growth of Staphylococcus Aureus. *Erlinda N. Seminiano and W. C. Frazier* ---- 161
Association Affairs ---- 164
Fifty-Third Annual Meeting Program ---- 166
News and Events ---- 171

JUNE (NO. 6)

We need an Increase in IAMFES Dues ---- 177
A Suggested Sanitary Standard for Freezer-Dispensed Ice Milk, Malted Milk and Shakes. *K. G. Weckel* ---- 180
Effect of the Type of Bacteriological Peptone in the Plating Medium upon the Enumeration of Pasteurization Resistant Bacteria in Milk. *W. R. Thomas, G. W. Reinbold and F. E. Nelson* ---- 182
Erratum ---- 187
Survey of Abnormal Milk Progress Administered by State Regulatory Agencies. *H. E. Randolph and D. J. Conner* ---- 188
Comparison of the Oval Tube with the Standard Plate Count Method for Determining Viable Counts of Raw Milk. *S. G. Wilson* ---- 191
A Suggested Procedure for Washing and Sanitizing a Soft-Serve Freezer Without Disassembling. *W. S. Miller* ---- 197
Variations in Volume of Milk Delivered by a Standard 0.01 ml Loop. *D. E. Jasper and J. Dellinger* ---- 199
Association Affairs ---- 202
News and Events ---- 205

JULY (NO. 7)

Deep Well Disposal of Industrial Waste in Indiana. *Richard A. Woodley and Samuel Moore* ----------211
Keeping Quality of Dairy Products Obtained at Retail Outlets. I. Low-Fat Milk, Skimmilk and Chocolate Flavored Milk. *B. E. Langlois, H. E. Randolph and Nancy M. Crume* ----------214
